

RETHEMALIZER

*"Elkay's rethermalizer is a game changer for my business. It helps me reduce food waste and labor costs without jeopardizing the quality or meal consistency. With greater efficiency in the kitchen I am now able to spend more time managing my business and building lasting rapport with my guests."*

*- Ari Lleshi, Executive Chef & Restaurateur  
Harvester Cafe*

**Efficiency. Consistency. Versatility.**

Consistently bring your prepackaged foods to precise serving temperatures without sacrificing quality, taste, or texture.

## Elkay Rethermalizers

Elkay's line of Rethermalizers are designed to efficiently bring prepackaged foods, from previously chilled or frozen states, to serving temperatures without sacrificing quality, taste, or texture. With precise thermostatic temperature controls you can ensure that even the most delicate or gourmet foods can be held at serving temperature for hours, without being overcooked. With its simplistic design and easy to use controls, even the most novice of cooks or kitchen operators can utilize this piece of kitchen equipment.

### Key Benefits

**Increase Efficiency:** Heat and hold pre-portioned quantities in bulk, for hours until ready to serve.

**Ensure Quality:** Rethermalizing prevents any changes in product taste or texture while cooking.

**Maintain Consistency:** Previously prepared dishes can be brought to the same temperature, at the same time, by anyone in the kitchen.

**Reduce Waste:** Prevent overcooking or burning common with other re-heating methods.

**Menu Versatility:** Because meals are packaged, different items can be heated at the same time, without cross contamination.

### Industries of Use

- Chain and Independently Owned Restaurants
- Educational Institutions
- Healthcare Facilities
- Hospitality
- Banquet Halls
- Supermarkets
- Convenience Stores
